

UA SIE 414/514 Law for Engineers and Scientists / Spring 2022

SYLLABUS

Catalog description: Topics covered in this course include US government structure; common law, Federal Acquisition Regulations government and Uniform Commercial Code commercial contracts principles; administrative, intellectual property, product liability, torts, environmental, corporate and employment relations law important to engineers and scientists.

Prerequisites: Upper-division standing in College of Engineering.

Textbook(s): Legal Aspects of Engineering, Latest Edition, Cynthia Gayton.

Course Outcomes: This course introduces students to the legal aspects of dealing with technology products and services. Specific outcomes include:

- Understanding of the legal system, and the controls it exerts on the activities of engineers and managers in practice.
- Learn basic legal concepts to enable the identification of possible issues/problems and make more informed decisions on when to confer with legal counsel in management or practice of engineering.
- Learn the details of what the individual's responsibilities are to ensure legal behavior in management or practice of engineering.
- Understand the procedures and documentation required to write and submit a grant proposal to a governmental agency

Topics Covered: The US Regulatory and Legal System, Administrative Law
Government & Commercial Proposals & Contracting (FAR and UCC)
Torts & Product Liability
Environmental Laws
Ethics
Intellectual Property
 Patents
 Copyrights
 Trade Secrets
 Data Rights
Corporate and Employment Law

Class Schedule: Two 75 minute lectures per week. MW 4:30 pm to 5:45 pm. AME S212/Online

Class Pace: See Class Schedule

Class Format, Exam, and Grading Policy:

Attendance will be taken in this class. Material will be presented in class that is not in the textbook and discussions that amplify, clarify, and/or apply the textbook will be conducted.

GRADING

Four(4) elements will determine your grade:

- 1) There will be two (2) quizzes, a mid-term exam and a final exam, counting for 40% of the class grade.
- 2) Group Small Business Innovation Research Government Proposal (Written Technical and Cost Volumes, Contracts/Supply Chain Volume, IP Strategy/Data Rights Assertions, and Verbal Management Presentation) including 2 interim presentations and a final Gate 4 presentation counting for 45% of the class grade.
- 3) There will be five (5) homework assignments throughout the semester worth 15% of the class grade.
- 4) Extra Credit Quiz and other opportunities available at Instructor discretion

Grading Scale: A: 90% and above

B: 80-89%

C: 70-79%

D: 60-69%

All exams will be administered and graded "electronically," i.e., through d2l and will only be accessible during date and time indicated. The final exam is comprehensive and will allow open book and notes. However, there will be a time limit of 1 hour for the midterm, and 2 hours for final exam. Note, there are no make-up exams. If you miss an exam with no valid excuse, then you will be given a "0" for that exam. If there is a medical emergency, then you will need a doctor's note. **The final exam is mandatory and there will be no change in time as this would be a violation of University policy.**

Academic Integrity Policy:

Students are encouraged to share intellectual views and discuss freely the principles and applications of course materials. Students are expected to adhere to the UA Code of Academic Integrity as described in the UA General Catalog. See: <http://dos.web.arizona.edu/uapolicies/>

Classroom Behavior Policy:

As a courtesy to your fellow students and the instructor, cell phones, portable audio devices, tablets, and lap top computers are to be turned off during class except for note taking. Talking

with neighbors, inappropriate laughing, and disruptive behavior will not be tolerated. The Arizona Board of Regents' Student Code of Conduct, ABOR Policy 5-308, prohibits threats of physical harm to any member of the University community, including to one's self. See: <http://policy.web.arizona.edu/~policy/threaten.shtml>.

Special Needs and Accommodations:

Students who need special accommodation or services should contact the Disability Resources Center, 1224 East Lowell Street, Tucson, AZ 85721, (520) 621-3268, FAX (520) 621-9423, email: uadrc@email.arizona.edu, <http://drc.arizona.edu/>. You must register and request that the Center or DRC send me official notification of your accommodations needs as soon as possible. Please plan to meet with me by appointment to discuss accommodations and how my course requirements and activities may impact your ability to fully participate. The need for accommodations must be documented by the appropriate office.

Course Withdrawal Policy:

Course withdrawals filed by the end of the fourth week of classes result in cancellation of registration in the course. For course withdrawals filed from the end of the fourth week of classes until the end of the eighth week of classes, the grade of "W" is awarded to students who are passing at the time of withdrawal; the grade of "E" may be awarded to students not passing at the time of withdrawal. Both grades show on the student's permanent record.

The last day on which a student may drop a course is the last day of the eighth week during which classes are held, except for an extraordinary reason approved by the academic dean, who has stated, "Failing the class is not an extraordinary circumstance. 'I was sick for a week' is not an extraordinary circumstance. The College of Engineering Dean's Office is holding to the drop policy and we are evaluating extraordinary circumstances. If a student decides to stay in a class and then later fails, we will not just give them a "W" as if they dropped. Students are responsible for their decisions."

Subject to Change Statement:

Information contained in the course syllabus and class schedule, other than the grade and absence policy, may be subject to change with advance notice, as deemed appropriate by the instructor.
